-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-10 are rejected under 35 U.S.C. 102(a) as being anticipated by Kobayashi et al. The recitations of the rubber seal member baked onto the outside of the tube member and the guide member, orifice member and plate member being caulked to the tube member are considered to be mere methods of assembly which do not carry patentable weight in an apparatus claim.

3. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by either Sendo et al or Taguchi. The recitations of the rubber seal member baked onto the outside of the tube member and the guide member, orifice member, and plate member being caulked to the tube member are considered to be mere methods of assembly which do not carry patentable weight in an apparatus claim.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
